still. Slowly litese targers unwound from the non and the air was neit with one long loud wal,—"My toold he is'nt three!"and she lay at the loot of the lamp-pot. I have studied the records of these seven hundred and sixty-live men, and I think it it but a facestimle of hundreds of other past such, all over the land, until the seven hundred and sixty-live is swollen to upwards of two millions. They enlist ed, they were susted into companies, A, II, and so down the line to its end. They went to the front and were then "Divaried to drive a wagon." Where that wagonises stalled, and what became of the driver, food knows,—no record tells. "Left in hospital," took knows,—no record tells. "Left in hospital," was he ever abschaged? or did he go out on a cassion with empty soots attached to the stirrup of the horse that followed in the rear! "Taken puisoner," Was he ever released, pariod of exchanged? Or was he shot on the dead line, reaching for a cup of water not hinch to cool his parched and levered tongue? No record tells the story.

And then I think of how many times the lather and mother have watched the returning host go by, and failed to see in the baway solder before them, the boy who left them a few years ago. Of how many thous the wie has gazed at the returning tolimin and failed to recognize in the broken down old man, the husband who left her in the pinne of life and vigor of thanhood, but all; how many more times has gone up in erry, "He is in there!" and as I ask where a he, I think of that far off land,—

By Nelso's lonely mountain.

On this side Jodan's waye. one communication, it is at the themsorable of Manassas and Bull Run, and here, sail as to be to tell the story, you met a defeat. The contact of the day found you retreating leaving betwo killed, one a prisoner and bringing away wounded. Here Weysnouth shed its first blood e war,—no, not its list blood,—table who guds her lineband's sword little ones who weep or wonder basely speaks the cheeting word. Though her heart was rest assumer; ned mightly in her dreams to heart solved its point of death around him rattle, is acred blood as e'er pointed inport the held of battle! nother who conceals her gried, to her breast hir son—she presses breathes a few brave words and brief, ig the jattrol brow she presses, no one but her secred (rod, now the jain that weights upon her,

sk where is he, I think of that far off land,—
by Nebo's lonely monitain
On this side Jordan's wave,
In a vale in the land of Moab,
Where hes a lonely grave;
And no man dug that sepulchet,
And no man saw it e'er;
For the "Angel of God" uptimed the sod,
And I think there are inst such graves for Received on I reedom's Iteld of honor!"

So here and there the blood was shed which rought no victory, but taught us that we had enteed upon no three months parine, and had no rean fee with which to contend. And now the ark cloud settled heavily along the entire line from he Atlantic to western Missouri, the army was eing rapidly depleted by the expiration of the time of the three months unen and new recurbs were not et in the field. Cuttis west of the Mississippin did the leaders along the Ohio Valley were calling or two hundred and fifty thousand metr with which organize an army and the authorities at Washagton were asking for as nany more for its detence And I think there are just such graves from Gettysburg to Florida, all through the information of western Virginia and Tennesce, they are scattered through the interactions, swamps and Edyous of teediga, Mississippit, Lourisana and Arkanisas. And then the great shadows of time roll on, and away down in the distant Future I hear a ougle call, their the trainp, trainp of a mighty loss.—Trainp, trainp, they go, men from every nation and age in the world's listory. Trainp they go, until there comes a company wearing bright roues and mose tadiant crowns than any other. I ask him with the little book, who are these in beight array? more tadiant crowns than any other. I ask him with the little book, who are these in bright array is and he says "Sir, thou knowest." These are they who come up from unnonumented and undecorated graves. They are the heroes of the Grand Army of the Republic of the United States of America who tought in the great war for Freedom in the years 1501 to 1505 of the Christian Eta.

The services, hath morning and evening were algoropriate to the day. In the morning Rev. Mr. Eaton preached from Isaiabio:132 The glory of Lebanon shall come into thee, the fir Age, the pine two more than the pine to the day around the law together. In beautify come unto thee, the fir \$\(\xi\)ee, the pine tree and the bux together, to be antify the place of my sanctuary, and I will make the place of my feet glorious,"

After albuling to the perulibreiremustances under which the language of the lext was written, Mr. Eaton procesded to show how accurately the prople had described the work of tiod, who was always working to cheautify the place of His sanctuary and to make the place of His feet glorbus," He said, "Had it been possible for us to have stood back a million years in the history of our glide, mosneli sight as our church presents this marning would have been spen; for then there would have been neither flower nor fern, shrulenog tree. Yet all through those incounted ages of dardness and chaos God was working untiringly to beautify His sanctuary and to make the place of His feet glork then, and He was working to bring it work He permits us all to engage, to share the blesselness which that work brings all the way along, and to share the glory with which that work shall at last be crowned. Every blade of grass we cause to grow, every flower we make home we make tocautiful, every whild's nature we help to control, every grace we aid to our own characters, every immortal soul we help on the Heaver ward way, is a contribution to that for which the is working.

Mr. Eaton then proceeded to enforce

the noral lessons of "Children's Sur day," as suggested by the prophet language. As the fir tree, the pine tre and the box together, with all the glury of Lebanon's unrivalled brests were to be brought to beautify the sanctuary of the Lord and to make the place of His feet glorious, so it is fitting that we bring the beautiful and fragrant offer ings of garden and field, hill-sole and forest, to adoru this house of the Lord, mt to make this samemary ghorion But let us not suppose that all this is to be done simply for the purpose of mak ing the smeatury outwortly locartiful. The prophet's language has a deeper meaning than this; all outward adorament was to the end that the people might be brought to 'see the Salvation of tipal. As the visible bemple was to be beautified by the fir tree, the pine tree and the bex together, with all the glory of Leisman, so should that inviible temple which tical has constituted in each human soul, he adorned by every lovely virtue, every sweet grace, every moral principle, every spiritual and make it a fit dwelling place of the Most High. But while all beautiful things are brought, let not the most as sweet bads of immortal hope and promise, with the prayer that God may seep them and help us to keep them to surfty and innocence, that They may purity and innocence, that they may adorn the earthly sanctuary while they five, and at last be taken our readorn that house not made with leands, element in the heavens.
